node-red

Your environment has been set up for using Node.js 18.12.0 (x64) and npm.

C:\Users\Welcome>cd C:\Program Files\nodejs

C:\Program Files\nodejs>npm install -g --unsafe-perm node-red

npm WARN deprecated @types/keyv@4.2.0: This is a stub types definition. keyv provides its own type definitions, so you do not need this installed.

added 292 packages, and audited 293 packages in 1m

39 packages are looking for funding
run `npm fund` for details

5 vulnerabilities (4 low, 1 moderate)

To address issues that do not require attention, run:
npm audit fix

To address all issues (including breaking changes), run:
npm audit fix --force

Run `npm audit` for details.

node-red

Your flow credentials file is encrypted using a system-generated key.

If the system-generated key is lost for any reason, your credentials file will not be recoverable, you will have to delete it and re-enter your credentials.

You should set your own key using the 'credentialSecret' option in your settings file. Node-RED will then re-encrypt your credentials file using your chosen key the next time you deploy a change.

3 Nov 14:33:35 - [info] Server now running at http://127.0.0.1:1880/

3 Nov 14:33:35 - [warn] Encrypted credentials not found
